Commissioner Fleming;

An investigation should be launched into the mismanagement of the nuclear projects. The CEO of both utilities should be held accountable for this debacle and mismanagement of funds. The state and rate payers should insist on the top management being replaced.

They are trying to put the spin on the new decision as to how much money they are saving the rate payers by stopping now. Look at how much money they have squandered by their decisions to move forward at prior crossroads of this project.

Please utilize your position to hold these people accountable for their poor decisions and poor business performance.

Thank you.
